

AUGMENT THE WHOLE SECURITY SYSTEM WITH AI

Surveillance

Remote access for surveillance

AI-powered auto-pilot guarding
Stay connected with live feed
Recorded video playback

Alarm

Integrated Alarm system

Video verification for traditional alarms
Video enhancement for alarm panels
Two-way updates with Automation Platform

Horn Speaker

Smart audio intervention

Automate recorded sound bites to deter intruders. Interact with individuals on your property anywhere from your mobile app

Network

Connecting from anywhere

Ultra Wideband networks for continuous connection and data transfer to cloud platform for real-time security monitoring

Flexible, Cost Effective

Avoid expensive facilities modification or installation costs. Supercharge your existing security system with no new hardware or software.

Prompt Response & Action

Sentry AI Guard sends real-time suspicious activity alerts to users and security personnel enabling a rapid response to potential threats.

Video Analytics

Calibrate analytics for the specific scene and use case. Auto talkdown feature deters crime without human involvement.

Security Operations Center

Connect seamlessly to our Fusion Centers to monitor in real-time and notify authorities.

Patrol Guards

Empower patrol guards with the insights from cameras and provide AI assist for quick deterrence and investigation.

Quick Deployment

Setting up Sentry AI Guard doesn't require any infrastructure change or electrical wiring for installation.

SMART ASSISTANT FOR YOUR SECURITY TEAM

Operations Center

Multi-site Management
Regions of Interest by alert type
Scheduling & Agent Shift Management
Live View, Camera Wall, History & Audit trail
Camera Health Check
Safelist & Watchlist Management

Guard Team

Team Collaboration
Real-time Alert Handling
Live View - Camera cross check
Request Abort - Dispatch
Provide instructions to the team
Arm - Disarm the system

Real-time Intelligent Detection

Sentry AI Guard uses the latest AI technologies to instantly detect suspicious behavior and unauthorized access. Sentry AI Guard incorporates intelligent algorithms that minimizes false alarms ensuring that security personnel can focus on genuine threats.

Enhanced Situational Awareness

Sentry AI Guard continuously learns and adapts to evolving threats and changing environments. Performance of each camera is optimized based on analyzing field-of-view and monitoring requirements. People and vehicle monitoring are separately optimized.

STATE-OF-THE-ART ARTIFICIAL INTELLIGENCE

Eliminate crime at your site by deploying Sentry AI Guard

Compatible with major surveillance cameras, recording system, hornspeakers and network.

Smart Sentry Cloud receives data and uses AI technologies with situational awareness to detect suspicious activity.

Smart Sentry Portal for live monitoring and managing alarms. It also connects to 3rd party professional monitoring systems.

Smart Sentry App for users and patrol guards for collaborating, dispatching, manual talk down.

Comprehensive solution with optional professional monitoring and guard dispatch services.
